

Mark Sorensen

Candidate Bio

Dr. Sorensen is Associate Professor of Anthropology at University of North Carolina at Chapel Hill. He has been a member of the HBA since 1999. His research focuses on market integration and the nutrition transition in the Ecuadorean Amazon and on inflammation and CVD risk in Siberia.

Platform Statement: I am honored to have been nominated for the position of Secretary of the Human Biology Association. The role of the Secretary is key to the functioning of the association and to communication between the Executive Committee and the membership. In the twenty years I have been a member, I have not had a service role in the association, and I would be thrilled to contribute to the organization that has been so important to my professional development. I look forward to the opportunity to serve the HBA.
